

PRINCE 2 Foundation – 3 Days

Course Objectives

This course is designed to provide the skills and experience required to implement the UK Government's OGC PRINCE2 Methodology.

PRINCE2 is a project management method designed to provide a framework covering the wide variety of disciplines and activities required within a successful project.

This course is instructor led and will take the delegates through the principles of the PRINCE2 methodology using the official guides provided by OGC. In addition, project scenarios will be used to demonstrate the techniques. This course is intended to provide the delegates with the knowledge required to sit the foundation examination.

PRINCE2 is a structured method providing organisations with a standard approach to the management of projects. The method embodies proven and established best-practice in project management. It is widely recognised and understood, and so provides a common language for all participants in the project.

PRINCE2 provides benefits to the organisation, as well as the managers and directors of the project, through the controllable use of resources and the ability to manage business and project risk more effectively. PRINCE2 enables projects to have:

- A controlled and organised start, middle and end;
- Regular reviews of progress against plan and against the Business Case;
- Flexible decision points;
- Automatic management control of any deviations from the plan;
- The involvement of management and stakeholders at the right time and place during the project;
- Good communication channels between the project, project management, and the rest of the organisation.
