

## Excel 2010 Upgrade - 1 day

### Description:

Whether you are upgrading from Office 2007, or Office 2003 and earlier, this course is designed to introduce you to and fast track you through the changes in the latest version of Microsoft Office Excel. Not only does it cover the key features and changes in detail but it gives you insights as to their development and what we've found works, and what doesn't. This course has all of the changes that we think are critical for you to get up and running with Excel 2010 as quickly, as effortlessly, and as productively as possible.

Microsoft Office Excel 2010 takes getting used to. Excel 2010 benefits from the results orientated user interface. Instead of clicking through complex menus and toolbars, commands are accessed through the new task orientated tabs. Once you have mastered working with the new interface, you will find you are able to create and manage complex spreadsheets more easily than ever before.

This course introduces the new features and functionality of Excel 2010 and will help you to get up to speed quickly.

### Pre-requisites:

This course is designed for experienced users who have worked with earlier versions of Excel, and who have, or about to upgrade to Microsoft Office Excel 2010. This course covers the commonly used new features for a typical user.
