

### Adobe Fireworks Introduction / Intermediate – 2 days

#### Course Objectives

In this 2-day course delegates will learn how to use Fireworks to create sophisticated web graphics using both vector and bitmap images.

#### Prerequisites

Pre-requisites for this course include a general understanding of web site creation and, if you are particularly interested in integrating Fireworks graphics with Dreamweaver web pages and templates, a basic knowledge of Adobe Dreamweaver would be beneficial.

#### Exercises

This course is instructor led, involving the utilisation of examples and exercises in a workshop environment.

#### Course Content

##### Bitmap Editing

- Bitmap versus Vector Graphics
- Fireworks Editing Modes
- The Fireworks Panels
- Setting Up a Document
- Editing Bitmap Object
- Using the Fireworks Editing Tools

##### Selecting, Grouping and Stacking

- Making Selections in Vector Mode
- Grouping Objects
- Using the Layers Panel
- Using Single-layer Editing
- Changing the Stacking Order of Objects
- Using the Select Behind Tool

##### Applying Colours and Styles

- Choosing Colours
- Selecting from Swatches of Color Mixing Colours
- Saving Selected Colours
- Using the Color Boxes
- Creating and Using Styles

#### Using Vector Tools

- The History Panel
- The Knife Tool
- Applying and Editing Strokes
- Changing Stroke Placement
- Applying Fill Color
- Trimming the Canvas
- Using the Info Panel

#### Exporting and Optimising

- Exporting your Images
- Choosing the Image Format
- Exporting as GIF
- Previewing in the Workspace
- Working with the Color Table
- Creating Transparency
- Using a Matte Color
- Exporting as JPEG
- Saving Export Presets

#### Creating Animated GIF Images

- Defining Animated GIFs
- Making an Animation
- Exporting a GIF Animation
- Creating Symbols

#### Applying Text, Fill and Live Effects

- Adding Text
- Aligning Objects
- Adding Live Effects
- Applying Transformations
- Applying Fills
- Using Patterns
- Using Textures
- Changing the Opacity
- Creating Gradients

#### Using Image Maps and Rollovers

- Creating Image Maps
- Using the URL Panel
- Slicing an Image
- Creating Disjointed Rollovers
- The Behaviours Panel
- Adding a Pop-up Menu

ACUITY TRAINING LTD

# Adobe Fireworks

## Introduction / Intermediate

### Creating Buttons

- Working with Rollover Buttons
- Using the Button Editor
- Working with the Web Layer
- Using Live Effects for Rollover Buttons
- Using the Link Wizard

### Integration with Dreamweaver

- Using Fireworks in Dreamweaver
- Updating HTML from Fireworks
- Inserting Buttons from Fireworks into Dreamweaver
