

## Illustrator Advanced

### Course Objectives

This course focuses on the advanced features of Illustrator and power shortcuts to enhance your workflow. A methodical approach to using the vector drawing tools in Illustrator will be taught to help you unlock your creative potential. During this course we will explore filters, effects and object transformation as well as the web exportation tools Illustrator provides.

### Prerequisites

In order to benefit fully from this course you will need to be an advanced user of Illustrator preferably having attended our Introduction / Intermediate Adobe Illustrator course.

### Exercises

This course is instructor led, involving the utilisation of examples and exercises in a workshop environment.

### Topics:

#### Path Commands

- Compound Paths
- Cutting shapes using pathfinder
- Outlining the stroke of a path
- Creating offset paths

#### Masks

- Introduction to clipping paths and opacity masks
- Creating a clipping mask
- Creating opacity masks

### Adjusting Typography

- Flow type
- Linking type containers
- Linking multiple type containers simultaneously
- Wrapping text around items
- Formatting body text
